ISSUE HIGHLIGHTS

- Hemoclips for childhood upper GI bleeding
- Diagnosis of extrahepatic biliary atresia
- Analysis of colorectal polyps
- Colonic diverticulitis and visceral obesity
- CT Enterography diagnosis of Meckel’s diverticulum

Intestinal Microbiota-Obesity-Fatty Liver

HF diet/High fructose intake

Increased IP & BT

Dysbiosis (Higher Firmicutes and lower Bacteroidetes)

LPS

Intestinal wall

Liver

Systemic/portal circulation

TLR4 mediated inflammation

Inflammasomes (NLRs)

Pro-inflammatory cytokines production (IL-1β, IL-6, TNF-α)

Persistent inflammation exacerbates steatosis into NASH
Aims and Scope

The Turkish Journal of Gastroenterology is the double-blind peer-reviewed, international publication organ of the Turkish Gastroenterology Society. The journal is a bimonthly publication, published on February, April, June, August, October and December and its publication language is English.

The Turkish Journal of Gastroenterology aims to publish manuscripts at the highest clinical and scientific level on original issues of gastroenterology and hepatology at the international level. The journal publishes original papers, review articles, case reports and letters to the editor on clinical gastroenterology and hepatology.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), the European Association of Science Editors (EASE).

The Turkish Journal of Gastroenterology is indexed in Science Citation Index Expanded and PubMed/MEDLINE.

The Turkish Journal of Gastroenterology financial expenses of the journal are covered by the Turkish Gastroenterology Society.

Permissions and Reprints
Permissions for reproduction of materials published and reprints in the Turkish Journal of Gastroenterology should be requested from the editorial office at tgd@tgd.org.tr.

Instructions for authors
Instructions for authors are published in the journal pages and could be accessed at the web site of the journal www.turkjgastroenterol.org.

Material Disclaimer
Statements or opinions expressed in the manuscripts published in the Turkish Journal of Gastroenterology reflect the views of the author(s) and not the opinions of the editors, the editorial board and the publisher; the editors, the editorial board and the publisher disclaim any responsibility or liability for such materials.

The journal is printed on an acid-free paper.
Instructions to Authors

The Turkish Journal of Gastroenterology is the double-blind peer-reviewed, international publication organ of the Turkish Gastroenterology Society. The Turkish Journal of Gastroenterology publishes original papers, review articles, case reports and letters to the editor on clinical gastroenterology and hepatology. The journal is a bimonthly publication, published on February, April, June, August, October and December and its publication language is English.

The Turkish Journal of Gastroenterology discourses the submission of more than one article dealing with related aspects of the same study. Review articles on selected clinical and basic topics of interest will be solicited by the editors. In exceptional cases, non-invited reviews may be considered for publication.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), the European Association of Science Editors (EASE).

The Turkish Journal of Gastroenterology will only evaluate manuscripts submitted via the journal’s self-explanatory online manuscript submission and evaluation system, manuscripts submitted via any other medium will not be evaluated.

Manuscripts are published on the understanding that they are original contributions and do not contain data that have been published elsewhere or are under consideration in another Journal. Meeting abstracts are not considered as a duplicate publication but should be disclosed in the cover accompanying the manuscript.

Authors must obtain written permission from the copyright owner to reproduce any previously published figure, table, or any other material in both print and electronic formats. The original source should be cited within the references and below the reprinted material.

The Turkish Journal of Gastroenterology requires each submission to be accompanied by a Copyright Transfer Form, an Author Contributions Form and an ICMJE Form for Disclosure of Potential Conflicts of Interest.

Statements or opinions expressed in the manuscripts published in The Turkish Journal of Gastroenterology reflect the views of the author(s) and not the opinions of the editors, the editorial board or the publisher; the editors, the editorial board and the publisher disclaim any responsibility or liability for such materials.

The final responsibility in regard to the published articles rests with the authors.

Each individual listed as an author should fulfil the authorship criteria recommended by the International Committee of Medical Journal Editors (Uniform Requirements for Manuscripts Submitted to Biomedical Journals. http://www.icmje.org). Individuals who contributed to the preparation of the manuscript but do not fulfill the authorship criteria should be acknowledged in an acknowledgment section, which should be included in the title page of the manuscript.

The Turkish Journal of Gastroenterology requires and encourages the authors and the individuals involved in the evaluation process to disclose any existing or potential conflicts of interests including financial, consultant, institutional and other relationships that might lead to bias or a conflict of interest.

A submitted manuscript will not be reviewed for publication until a conflict of interest disclosure is submitted. The disclosures should be included in main manuscript text before references and can be included in cover letter to the editor. The following information must be provided:

- The author acting as the submission’s guarantor and the corresponding author must be identified in the letter to the editor.
- Any financial or editorial assistance received to support the research and/or article should be cleared.
- Identification of any relationships that any author or other entity that provided financial or editorial support may have in potential competing interests to those referenced in the submission.

The authors should state in the Materials and Methods section of the main text that experiments have been performed in comply with the ethical principles of the assigned institutional board or national committee. Application or approval number/year for the study should also be indicated. For animal experiments, the authors additionally should state that international standards regarding the animal care and handling have been followed during the experiments.

It is the author’s responsibility to ensure that a patient’s anonymity be carefully protected and to verify that any experimental investigation with human subjects reported in the manuscript was performed with informed consent and following all the guidelines for experimental investigation with human subjects required by the institution(s) with which all the authors are affiliated. For photographs that may reveal the identity of the patients, signed releases of the patient or of his/her legal representative should be enclosed; otherwise, patient names or eyes must be masked out to prevent identification.

When reporting experiments on human subjects, indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional or regional) and with the Helsinki Declaration (JAMA 2000;284:3043–3049).

As part of submission of the manuscript, the correspondent author should send a short statement declaring that he/she accepts to undertake all the responsibility for authorship during the submission and review stages of the manuscript.
Originality, high scientific quality and citation potential are the most important criteria for a manuscript to be accepted for publication.

Manuscripts submitted to the journal will first go through a technical evaluation process where the editorial office staff will ensure that the manuscript is prepared and submitted in accordance with the journal’s guidelines. Submissions that don’t conform the journal’s guidelines will be returned to the submitting author with technical correction requests. Manuscripts that conform the journal’s guidelines will be reviewed by at least 3 external peer reviewers during the evaluation process. The Editor in Chief is the final authority in the decision making process.

Authors of a paper accepted for publication in the Turkish Journal of Gastroenterology should be in consent of that editors could make corrections without changing the basic meaning of the text of the manuscript.

The journal expects the submitting authors to have their manuscripts reviewed by a native English speaker before submission. Information on language review should be provided in the cover letter during submission.

All submissions are screened by a similarity detection software. In case there is more than 20% similarity with existing studies, the paper is automatically rejected.

MANUSCRIPT PREPARATION

Manuscripts should be prepared in accordance with the ICMJE - Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals (updated in December 2013 – available at www.icmje.org).

Original Investigations and Reviews should be presented according to the guidelines: randomized study - CONSORT, observational study – STROBE, study on diagnostic accuracy - STARD, systematic reviews and meta-analysis PRISMA, animal experimental studies - ARRIVE, nonrandomized behavioural and public health intervention studies - TREND.

Cover letter

A letter of submission must be included in all manuscripts, including revised manuscripts.

This letter may be used to emphasize the importance of the study or new significant points included to the revised manuscript. This letter can be typed or added to the relevant section of the online submission using copy/paste method. In the cover letter of each submission, the authors should briefly state the existing knowledge relevant to the study and what new contributions does their study make to the existing knowledge.

Title page

A separate title page should be submitted with all submissions and should include the title of the manuscript, names, affiliations and major degree(s) of the author(s) and source(s) of the work or study, a short title (running head) of no more than 50 characters. The name, address, telephone (including the mobile phone number) and fax numbers and e-mail address of the corresponding author should be listed on the title page. Grant information and other sources of support should also be included on the Title page. Individuals who contributed to the preparation of the manuscript but do not fulfill the authorship criteria should be acknowledged in the title page.

Main Document

Abstract

All manuscripts should be accompanied an abstract. A structured abstract is required with original articles and it should include the following subheadings: Background/Aims, Material and Methods, Results and Conclusion. A structured abstract is not required with review articles and case reports. The abstract should be limited to 250 words for original articles and review articles and 150 words for case reports.

Key Words

Each submission should be accompanied by 3 to 5 key words which should be picked from the Medical Subject Headings (MeSH) list (www.nlm.nih.gov/mesh/MBrowser.html).

Main Text

Original Articles: Acceptance of original papers will be based upon the originality and importance of the investigation. Prospective or retrospective clinical studies are considered as original papers.

Original Articles should be structured with Introduction, Materials and Methods, Results and Discussion subheadings. The number of references cited should not exceed 35 and the main text should be limited to 4000 words.

Introduction: Provide background information that will orient the general reader.

Materials/Patients and Methods: Provide a level of detail such that another investigator could repeat the work for methods that are used without significant modification. Citation of the original work will suffice. For reports of research using human subjects, state that informed consent was obtained from each patient and that institutional ethic committee approval was obtained.

State if informed consent was obtained from each patient and that ethic committee approval was obtained.

Results: Use tables and figures for better understanding. Please refer to the instructions before uploading images to the website.

Discussion: Discuss your results by citations; avoid discussion of other related works. Do not engage in a literature review.

Case Reports: Admission of isolated case reports is rare and restricted to only extremely original cases. We encourage original case series rather than isolated reports. Submission of case reports in above category in the letter to the editor format is possible and encouraged.
The main text of Case Reports should be limited with 1200 words and should be structured with the following subheadings: Introduction, Case Presentation and Discussion. The maximum number of references cited in a case report should be 10.

Review Articles: Mainly invited reviews on specific topics are published. In exceptional cases, non-invited reviews may be considered for publication. Individuals interested in writing a review article must correspond with the Editorial Office regarding the topic before submitting the entire manuscript.

Editorials: Invited brief editorial comments on selected articles are published in The Turkish Journal of Gastroenterology. Editorials should not be longer than 1000 words excluding references.

Letter to the editor: Letters related to articles published in recent issues of the Turkish Journal of Gastroenterology or to topics of gastroenterology are welcomed and will be considered for publication.

- Letters to the editors should be sent within 6 months of publication of the commented article. Should not be longer than 400 words excluding references. Commented article should be cited as a reference. Letters should include no more than 5 references.
- Letters to the editor, containing case reports or brief reports of studies should not be longer than 400 words excluding references. Letters should include no more than 5 references. The subheadings of the review articles should be planned by the authors. However, each review article should include a “Conclusion” section. The main text of review articles should be limited with 5000 words. The number of references cited should not exceed 50.

All acronyms and abbreviations used in the manuscript should be defined at first use, both in the abstract and the main text. The abbreviation should be provided in parenthesis following the definition.

Statistical analysis should be performed in accordance with guidelines on reporting statistics in medical journals (Altman DG, Gore SM, Gardner MJ, Pocock SJ. Statistical guidelines for contributors to medical journals. Br Med J 1983; 7: 1489-93.). Information on the statistical analysis process of the study should be provided within the main text and all references listed in the reference list should be referred to within the main text in parenthesis. Style and punctuation of each reference in the reference list should be in accordance with the examples listed below;

Standard journal article: Journal titles should be abbreviated in accordance with journal abbreviations used in Index Medicus (for journal abbreviations consult List of Journals indexed for MEDLINE published annually by NLM at http://www.nlm.nih.gov/tsd/serials/ji.html). When there are six or fewer authors, all authors should be listed. If there are seven or more authors, first 3 should be listed, followed by “et al.”. A list of authors should be followed by the full title of the article, journal title, year, volume and page numbers.

Books:

Tables
- Tables should be included in the main document and should be presented after the reference list. Tables should be numbered con-
secutively in the order they are referred to within the main text. A de-
scriptive title should be provided for all tables and the titles should 
be placed above the tables.Abbreviations used in the tables should 
be defined below the tables by footnotes (even if they are defined 
within the main text). Tables should be created using the “insert ta-
ble” command of the word processing software and they should be 
arranged clearly to provide an easy reading. Data presented in the 
tables should not be a repetition of the data presented within the 
main text but should be supporting the main text.

**Figures and Figure Legends**

Figures, graphics and photographs should be submitted as sepa-
rate files in TIFF or JPEG format) through the submission system. 
The files should not be embedded in a Word document or the main 
document. When there are figure subunits, the subunits should not 
be merged to form a single image. Each subunit should be sub-
mitted separately through the submission system. Images should 
not be labelled (a, b, c, etc.) to indicate figure subunits. Thick and 
thin arrows, arrowheads, stars, asterisks and similar marks can be 
used on the images to support figure legends. Like the rest of the 
submission, the figures too should be blind. Any information within 
the images that may indicate an individual or institution should be 
blinded. The minimum resolution of each submitted figure should 
be 300DPI. To prevent delays in the evaluation process all submitted 
figures should be clear in resolution and large in size [minimum 
dimensions 100x100 mm]

Figure legends should be listed at the end of the main document.

Once a manuscript is accepted for publication it will be provided 
with a registered DOI number following the acceptance decision. 
Manuscripts accepted for publication by the Turkish Journal of Gas-
troenterology will be published as ahead of print articles prior to the 
printing date of their scheduled issue. Corresponding author will be 
provided with a PDF Proof by the publisher once the production pro-
cess of an accepted manuscript is over. The publisher will request the 
corresponding author to list their correction requests if there are any 
and approve the publication of the manuscript.

**PUBLICATION FEE**

A non-refundable charge of 220 TL, (100 USD or 70 Euro) for each sub-
mitted manuscript must be paid by the author(s) to the Turkish Society 
of Gastroenterology [Türk gastroenteroloji Derneği] (Bank account: 
Türkiye Halk Bankası, Erk Branch Office), account numbers:

**Turkish Lira (TL):**
IBAN CODE: TR88 0001 2009 4010 0016 0000 63

**EURO (€):**
IBAN CODE: TR60 0001 2009 4010 0058 000112

**SWIFT CODE:**
TRHBTR2A

**US Dollars ($):**
IBAN CODE: TR87 0001 2009 4010 0058 000111

**SWIFT CODE:**
TRHBTR2A

In case of acceptance of a manuscript that contains colour illus-
trations, additional fees are requested be paid to the same bank 
account.

**PERMISSIONS AND REPRINTS**

Permissions for reproduction of materials published and reprints in 
the Turkish Journal of Gastroenterology should be requested from 
the editorial office at tgd@tgd.org.tr.

**INSTRUCTIONS FOR AUTHORS**

Instructions for authors are published in the journal pages and could 
be accessed at the web site of the journal www.turkjgastroenterol.org.

The journal is printed on an acid-free paper.
Case Reports

- **205** Acute liver damage and anorexia nervosa: A case report
  Lionel Bridet, Juan Jose Beitia Martin, Jose Luis Cabriada Nuno

- **209** Synchronous occurrence of hepatocellular carcinoma and intrahepatic cholangiocarcinoma in both lobes of the liver
  Serdar Topaloğlu, Kutay Sağlam, Adnan Çalık, Ümit Cobanoğlu, Mehmet Halil Öztürk

- **212** Meckel's diverticulum detected by computed tomographic enterography: Report of 3 cases and review of the literature
  Jae Min Lee, Chan Dong Jeen, Seung Han Kim, Jong Soo Lee, Seung Joo Nam, Hyuk Soon Choi, Eun Sun Kim, Bora Keum

Letters to the Editor

- **216** Endoscopic treatment of heterotopic pancreas localized in the duodenum
  Gürhan Şişman, Yusuf Erzin, Murat Tuncer, Hakan Şentürk

- **218** Laparoscopic resection of signet ring cell gastric cancer resembling infiltrating subepithelial tumor
  Abdulkadir Bedirli, Mehmet İbiş, Arzu Alkan, Özgür Ekinci

- **220** Drinking pineapple juice for undigested food in stomach
  Akif Altnbaş, Fuat Ekiz, Ömer Başar, Serta Kılıncalp, Barış Yılmaz, Bora Aktaş, Osman Yüksel

- **222** Are patients with chronic hepatitis B infection aware of delta hepatitis?
  Yüksel Gümürdülü, Burçak Evren Taşdoğan, Ümit Bilge Doğan, Banu Kara

- **224** Peptic ulcer and intestinal metaplasia associated with Helicobacter pylori colonization in gastric heterotopia of the tongue
  Ufuk Berber, Ismail Yılmaz, Bülent Evren Erkul, Mustafa Kaplan

- **226** Utility of diagnosing *H. pylori* in presence of intestinal metaplasia
  Ali Tüzün İnce

- **229** Have multiple orifices advantages in the drainage of pancreatic pseudocysts?
  Mukaddes Taçoğlu, Ali Tüzün İnce

Gastroenterology Elsewhere

- **230** Are we hopefully very close to the end of HCV?
  Veysel Tahan

- **232** Once spontaneous bacterial peritonitis develops, discontinue nonselective beta blockers permanently. A proposed practice change update
  Veysel Tahan
From the Editor

Dear Colleagues,

Physic is an ever changing science. As I remember the days of my graduation from medical faculty, I feel extreme gratefulness to my tutors who inspired me. However, as nothing can withstand the test of the time, most of the knowledge I learned became outdated. This is why, as physicians, we need an exhaustive continuing learning activity. Journals are the most essential resources for physicians to further their carriers. Our future scientific endeavors are shaped by the up-to-date knowledge we gather from them.

In this issue of TJG we present you very interesting subjects:—Intestinal microbiota—Fructose—Obesity— and Fatty liver cycle; Complications and management of peptic ulcer disease; Analysis of colorectal polyps; Colonic diverticulosis and visceral obesity; and Chemotherapy of metastatic colorectal carcinoma are some.

We would be pleased to receive your comments to these studies as letter-to-the-editor format that are sent to corresponding author for response and both are published in the next issue.

We would publish the next issue in this month and we are going to catch the time by publishing the August issue in the same month. Afterwards all the issues will be published at the beginning of the relevant month.

We are pleased to inform you that we installed the Scholar-One system that will speed up our publication process.

In the editorial of the next issue, I will inform you about our half year performance and our prospective publishing time schedule.

We are expecting to receive your high quality studies for the forthcoming National Gastroenterology Week in which we are going to put the oral presentations on prime time competing only with each other. The time for presentation (12 minutes) and discussion (3 minutes) will also be ample.

This is my pleasure to be at your disposal at your future endeavors by all means.

Prof. Hakan Şentürk
Editor in Chief
