# THE TURKISH JOURNAL OF GASTROENTEROLOGY

## Aims and Scope

The Turkish Journal of Gastroenterology is the double-blind peer-reviewed, open access, international publication organ of the Turkish Gastroenterology Society. The journal is a bimonthly publication, published on February, April, June, August, October and December and its publication language is English.

The Turkish Journal of Gastroenterology aims to publish manuscripts at the highest clinical and scientific level on original issues of gastroenterology and hepatology at the international level. The journal publishes original papers, review articles, case reports and letters to the editor on clinical gastroenterology and hepatology.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), the European Association of Science Editors (EASE).

The Turkish Journal of Gastroenterology is indexed in Science Citation Index Expanded and PubMed/MEDLINE.

The Turkish Journal of Gastroenterology financial expenses of the journal are covered by the Turkish Gastroenterology Society.

## Permissions and Reprints

Permissions for reproduction of materials published and reprints in the Turkish Journal of Gastroenterology should be requested from the editorial office at [tgd@tgd.org.tr](mailto:tgd@tgd.org.tr).

## Advertising

For requests concerning advertising, please contact the Publisher.

## Instructions for authors

Instructions for authors are published in the journal pages and could be accessed at the web site of the journal [www.turkjgastroenterol.org](http://www.turkjgastroenterol.org).

## Material Disclaimer

Statements or opinions expressed in the manuscripts published in the Turkish Journal of Gastroenterology reflect the views of the author(s) and not the opinions of the editors, the editorial board and the publisher; the editors, the editorial board and the publisher disclaim any responsibility or liability for such materials.

The journal is printed on an acid-free paper.

# THE TURKISH JOURNAL OF GASTROENTEROLOGY

## Instructions to Authors

The Turkish Journal of Gastroenterology is the double-blind peer-reviewed, international publication organ of the Turkish Gastroenterology Society. The Turkish Journal of Gastroenterology publishes original papers, review articles, case reports and letters to the editor on clinical gastroenterology and hepatology. The journal is a bimonthly publication, published on February, April, June, August, October and December and its publication language is English.

The Turkish Journal of Gastroenterology discourages the submission of more than one article dealing with related aspects of the same study. Review articles on selected clinical and basic topics of interest will be solicited by the editors. In exceptional cases, non-invited reviews may be considered for publication.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), the European Association of Science Editors (EASE)

The Turkish Journal of Gastroenterology will only evaluate manuscripts submitted via the journal's self-explanatory online manuscript submission and evaluation system, manuscripts submitted via any other medium will not be evaluated.

Manuscripts are published on the understanding that they are original contributions and do not contain data that have been published elsewhere or are under consideration by another journal. Meeting abstracts are not considered as duplicate publications but should be disclosed in the cover letter accompanying the manuscript.

Authors must obtain written permission from the copyright owner to reproduce previously published figures, tables, or any other material in both print and electronic formats. The original source should be cited within the references and below the reprinted material.

The Turkish Journal of Gastroenterology requires each submission to be accompanied by a Copyright Transfer Form, an Author Contributions Form and an ICMJE Form for Disclosure of Potential Conflicts of Interest.

Statements or opinions expressed in the manuscripts published in The Turkish Journal of Gastroenterology reflect the views of the author(s) and not the opinions of the editors, the editorial board or the publisher; the editors, the editorial board and the publisher disclaim any responsibility or liability for such materials.

The final responsibility in regard to the published content rests with the authors.

Each individual listed as an author should fulfil the authorship criteria recommended by the International Committee of Medical Journal Editors (Uniform Requirements for Manuscripts Submitted to Biomedical Journals. <http://www.icmje.org>). Individuals who contributed to the preparation of the manuscript but do not fulfil

the authorship criteria should be acknowledged in an acknowledgments section, which should be included in the title page of the manuscript. If the editorial board suspects a case of "gift authorship", the submission will be rejected without further review.

The Turkish Journal of Gastroenterology requires and encourages the authors and the individuals involved in the evaluation process to disclose any existing or potential conflicts of interests including financial, consultant, institutional and other relationships that might lead to bias or a conflict of interest.

A submitted manuscript will not be evaluated for publication until a conflict of interest disclosure is submitted. The disclosure should also be included in the main document before the reference list and in the cover letter. The following information must be provided:

- The author acting as the submission's guarantor and the corresponding author must be identified in the letter to the editor.
- Any financial or editorial assistance received to support the research and/or article should be cleared.
- Identification of any relationships that provided financial or editorial support for the study which may in potential cause competing interests for the submission.

The authors should state in the Materials and Methods section of the main text that experiments have been performed in compliance with the ethical principles of the assigned institutional board or national committee. Application or approval number/year for the study should also be indicated. For animal experiments, the authors should additionally state that international standards regarding the animal care and handling have been followed while the conducting the experiments.

It is the author's responsibility to carefully protect the patients' anonymity and to verify that any experimental investigation with human subjects reported in the submission was performed with informed consent and following all the guidelines for experimental investigation with human subjects required by the institution(s) with which all the authors are affiliated with. For photographs that may reveal the identity of the patients, signed releases of the patient or of his/her legal representative should be enclosed.

When reporting experiments on human subjects, indicate whether the procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional or regional) and with the Helsinki Declaration (JAMA 2000;284:3043-3049).

As part of submission of the manuscript, the correspondent author should send a short statement declaring that he/she accepts to undertake all the responsibility for authorship during the submission and review stages of the manuscript.

Originality, high scientific quality and citation potential are the most important criteria for a manuscript to be accepted for publication.

# THE TURKISH JOURNAL OF GASTROENTEROLOGY

Manuscripts submitted to the journal will first go through a technical evaluation process where the editorial office staff will ensure that the manuscript is prepared and submitted in accordance with the journal's guidelines. Submissions that don't conform the journal's guidelines will be returned to the submitting author with technical correction requests. Manuscripts that conform the journal's guidelines will be reviewed by at least 3 external peer reviewers during the evaluation process. The Editor in Chief is the final authority in the decision making process.

Authors of a paper accepted for publication in the Turkish Journal of Gastroenterology should be in consent of that editors could make corrections without changing the basic meaning of the text of the manuscript.

The journal expects the submitting authors to have the language of their manuscripts scrutinized by a professional language editing company before submission unless at least one of the contributing authors is a native speaker. Information on language editing should be provided in the cover letter and a copy of the editing certificate provided by the editing company should be submitted with the manuscript. Submissions with language errors will be rejected without further evaluation.

All submissions are screened by a similarity detection software. In case there is more than 20% similarity with existing studies, the paper is automatically rejected.

## MANUSCRIPT PREPARATION

Manuscripts should be prepared in accordance with the ICMJE - Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals (updated in December 2013 - available at [www.icmje.org](http://www.icmje.org)).

Original Investigations and Reviews should be presented according to the guidelines: randomized study - CONSORT, observational study - STROBE, study on diagnostic accuracy - STARD, systematic reviews and meta-analysis PRISMA, animal experimental studies - ARRIVE, nonrandomized behavioural and public health intervention studies - TREND.

### Cover letter

A letter of submission must be included in all manuscripts, including revised manuscripts.

This letter may be used to emphasize the importance of the study or new significant points included to the revised manuscript. This letter can be typed or added to the relevant section of the online submission using copy/paste method. In the cover letter of each submission, the authors should briefly state the existing knowledge relevant to the study and the contributions their study make to the existing knowledge.

### Title page

A separate title page should be submitted with all submissions and should include the title of the manuscript, name(s), affiliations and major degree(s) of the author(s) and source(s) of the work or study, a

short title (running head) of no more than 50 characters. The name, address, telephone (including the mobile phone number) and fax numbers and e-mail address of the corresponding author should be listed on the title page. Grant information and other sources of support should also be included on the Title page. Individuals who contributed to the preparation of the manuscript but do not fulfil the authorship criteria should be acknowledged in the title page.

### Main Document

#### Abstract

All manuscripts should be accompanied an abstract. A structured abstract is required with original articles and it should include the following subheadings: Background/Aims, Material and Methods, Results and Conclusion. A structured abstract is not required with review articles and case reports. The abstract should be limited to 250 words for original articles and review articles and 150 words for case reports.

#### Key Words

Each submission should be accompanied by 3 to 5 key words which should be picked from the Medical Subject Headings (MeSH) list ([www.nlm.nih.gov/mesh/MBrowser.html](http://www.nlm.nih.gov/mesh/MBrowser.html)).

### Main Text

**Original Articles:** Original Articles: Acceptance of original papers will be based upon the originality and importance of the investigation. Turkish Journal of Gastroenterology encourages submission of widely readable clinical studies. Prospective or retrospective clinical studies are considered as original papers.

Original Articles should be structured with Introduction, Materials and Methods, Results and Discussion subheadings. The number of references cited should not exceed 35 and the main text should be limited to 4000 words. An original article can be signed by maximum 6 authors unless it is a multi-center study or that it required extensive labour.

**Introduction:** Provide background information that will orient the general reader.

**Materials/Patients and Methods:** Materials/Patients and Methods: Provide a level of detail such that another investigator could repeat the work for methods that are used without significant modification. Citation of the original work will suffice. For reports of research using human subjects, state that informed consent was obtained from each patient and that institutional ethic committee approval was obtained.

State if informed consent was obtained from each patient and that ethic committee approval was obtained.

**Results:** Use tables and figures for better understanding. Please refer to the instructions before uploading images to the website.

**Discussion:** Discuss your results by citations; avoid discussion of other related works. Do not engage in a literature review.

# THE TURKISH JOURNAL OF GASTROENTEROLOGY

**Case Reports:** Admission of isolated case reports is rare and restricted to only extremely original cases. Turkish Journal of Gastroenterology encourages submission of original case series rather than isolated reports. Submission of case reports in above category in the letter to the editor format is possible and encouraged.

The main text of Case Reports should be limited with 1200 words and should be structured with the following subheadings; Introduction, Case Presentation and Discussion. The maximum number of references cited in a case report should be 10. A case report can be signed by maximum 5 authors unless the report entails a rare disease or condition with a cohort or multi-center.

**Review Articles:** Mainly, invited reviews on specific topics are published. In exceptional cases, non-invited reviews may be considered for publication. Individuals interested in writing a review article must correspond with the Editorial Office regarding the topic before submitting the entire manuscript.

**Editorials:** Invited brief editorial comments on selected articles are published in The Turkish Journal of Gastroenterology. Editorials should not be longer than 1000 words excluding references.

**Letter to the editor:** Letters related to articles published in recent issues of the Turkish Journal of Gastroenterology or to topics of gastroenterology are welcomed and will be considered for publication.

- Letters to the editors should be sent within 6 months of publication of the commented article. Should not be longer than 400 words excluding references. Commented article should be cited as a reference. Letters should include no more than 5 references.
- Letters to the editor, containing case reports or brief reports of studies should not be longer than 400 words excluding references. Letters should include no more than 5 references.

The subheadings of the review articles should be planned by the authors. However, each review article should include a "Conclusion" section. The main text of review articles should be limited with 5000 words. The number of references cited should not exceed 50.

All acronyms and abbreviations used in the manuscript should be defined at first use, both in the abstract and the main text. The abbreviation should be provided in parenthesis following the definition.

Statistical analysis should be performed in accordance with guidelines on reporting statistics in medical journals (Altman DG, Gore SM, Gardner MJ, Pocock SJ. Statistical guidelines for contributors to medical journals. *Br Med J* 1983; 7; 1489-93.). Information on the statistical analysis process of the study should be provided within the main text.

When a drug, product, hardware, or software mentioned within the main text product information, including the name of the product, producer of the product, city of the company and the country of the

company should be provided in parenthesis in the following format: "Discovery St PET/CT scanner (General Electric, Milwaukee, WI, USA)"

All references, tables and figures should be referred to within the main text and they should be numbered consecutively in the order they are referred to within the main text.

Limitations, drawbacks and shortcomings of original articles should be mentioned in the "Discussion" section before the conclusion paragraph.

## References

References should be numbered consecutively in the order they are referred to within the main text and all references listed in the reference list should be referred to within the main text in parenthesis. Style and punctuation of each reference in the reference list should be in accordance with the examples listed below;

Standard journal article: Journal titles should be abbreviated in accordance with journal abbreviations used in Index Medicus (for journal abbreviations consult List of Journals indexed for MEDLINE published annually by NLM at <http://www.nlm.nih.gov/tsd/serials/lji.html>). When there are six or fewer authors, all authors should be listed. If there are seven or more authors, first 3 should be listed, followed by "et al.". A list of authors should be followed by the full title of the article, journal title, year, volume and page numbers.

Example: Mittal RK, Holloway RH, Penagini R, et al. Transient lower esophageal sphincter relaxation. *Gastroenterology* 1995; 109: 601-10.

## Books:

Chapter in a book: Sherry S. Detection of thrombi. In: Strauss HE, Pitt B, James AE, editors. *Cardiovascular Medicine*. St Louis: Mosby; 1974.p. 273-85.

Personal author(s): Cohn PF. *Silent myocardial ischemia and infarction*. 3<sup>rd</sup> ed. New York: Marcel Dekker; 1993.

Editor (s), compiler(s) as author: Norman IJ, Redfern SJ, editors. *Mental health care for elderly people*. New York: Churchill Livingstone; 1996.

Conference paper: Bengissson S, Sothemin BG. Enforcement of data protection, privacy and security in medical informatics. In: Lun KC, Degoulet P, Piemme TE, Rienhoff O, editors. *MEDINFO 92. Proceedings of the 7th World Congress on Medical Informatics; 1992 Sept 6-10; Geneva, Switzerland*. Amsterdam: North-Holland; 1992. P. 1561-5.

Scientific or technical report: Smith P, Golladay K. Payment for durable medical equipment billed during skilled nursing facility stays. Final report. Dallas (TX) Dept. of Health and Human Services (US). Office of Evaluation and Inspections: 1994 Oct. Report No: HHSIGOE 169200860.

# THE TURKISH JOURNAL OF GASTROENTEROLOGY

Dissertation: Kaplan SI. Post-hospital home health care: the elderly access and utilization (dissertation). St. Louis (MO): Washington Univ. 1995.

Article in electronic format: Morse SS. Factors in the emergence of infectious diseases. *Emerg Infect Dis* (serial online) 1995 Jan-Mar (cited 1996 June 5); 1(1): [24 screens]. Available from: <http://www.cdc.gov/ncidod/EID/cid.htm>.

## Tables

Tables should be included in the main document and should be presented after the reference list. Tables should be numbered consecutively in the order they are referred to within the main text. A descriptive title should be provided for all tables and the titles should be placed above the tables. Abbreviations used in the tables should be defined below the tables by footnotes (even if they are defined within the main text). Tables should be created using the "insert table" command of the word processing software and they should be arranged clearly to provide an easy reading. Data presented in the tables should not be a repetition of the data presented within the main text but should be supporting the main text.

## Figures and Figure Legends

Figures, graphics and photographs should be submitted as separate files (in TIFF or JPEG format) through the submission system. The files should not be embedded in a Word document or the main document. When there are figure subunits, the subunits should not be merged to form a single image. Each subunit should be submitted separately through the submission system. Images should not be labelled (a, b, c, etc.) to indicate figure subunits. Thick and thin arrows, arrowheads, stars, asterisks and similar marks can be used on the images to support figure legends. Like the rest of the submission, the figures too should be blind. Any information within the images that may indicate an individual or institution should be blinded. The minimum resolution of each submitted figure should be 300DPI. To prevent delays in the evaluation process all submitted figures should be clear in resolution and large in size (minimum dimensions 100x100 mm)

Figure legends should be listed at the end of the main document.

Once a manuscript is accepted for publication it will be provided with a registered DOI number following the acceptance decision. Manu-

scripts accepted for publication by the Turkish Journal of Gastroenterology will be published as ahead of print articles prior to the printing date of their scheduled issue. Corresponding author will be provided with a PDF Proof by the publisher once the production process of an accepted manuscript is over. The publisher will request the corresponding author to list their correction requests if there are any and approve the publication of the manuscript.

## PUBLICATION FEE

A non-refundable charge of 220 TL (100 USD or 70 Euro) for each submitted manuscript must be paid by the author(s) to the Turkish Society of Gastroenterology (Türk Gastroenteroloji Derneği) (Bank account: Türkiye Halk Bankası, Emek Branch Office), account numbers:

### Turkish Lira (TL):

IBAN CODE: TR88 0001 2009 4010 0016 0000 63

### EURO (€):

IBAN CODE: TR60 0001 2009 4010 0058 000112

### SWIFT CODE:

TRHBTR2A

### US Dollars (\$)

IBAN CODE: TR87 0001 2009 4010 0058 000111

### SWIFT CODE: TRHBTR2A

Payment receipts should be submitted with the manuscript during submission. In case of acceptance of a manuscript that contains colour illustrations, an additional fee of 50TL (25USD, 12€) is requested to be paid to the same bank account.

## PERMISSIONS AND REPRINTS

Permissions for reproduction of materials published and reprints in the Turkish Journal of Gastroenterology should be requested from the editorial office at [tgd@tgd.org.tr](mailto:tgd@tgd.org.tr).

## INSTRUCTIONS FOR AUTHORS

Instructions for authors are published in the journal pages and could be accessed at the web site of the journal [www.turkjgastroenterol.org](http://www.turkjgastroenterol.org).

The journal is printed on an acid-free paper.

## Review

### ■ 233 What is gastritis? What is gastropathy? How is it classified?

*Serra Kayaçetin, Servet Güreşçi*

## Original Articles

### ■ 248 Clinical characteristics and natural history of asymptomatic erosive esophagitis

*Sung Hoon Jung, Jung Hwan Oh, Sung-Goo Kang*

### ■ 253 Usefulness of insulin-like growth factor II mRNA-binding protein 3 (IMP3) as a new marker for the diagnosis of esophageal adenocarcinoma in challenging cases

*Behrang Kazeminezhad, Seyed Abbas Mirafsharieh, Kamran Dinyari, Davood Azizi, Abdolali Ebrahimi*

### ■ 257 Is there a difference between capsule endoscopy and computed tomography as a first-line study in obscure gastrointestinal bleeding?

*Seong Ran Jeon, Kim Jin-Oh, Kim Hyun Gun, Lee Tae Hee, Cho Jun-Hyung, Park Eui Ju, Lim Dae Seop, Kim Wan Jung, Ko Bong Min, Cho Joo Young, Lee Joon Seong, Lee Moon Sung*

### ■ 264 Assessment of presence and grade of activity in ileal Crohn's disease

*Elif Saritaş Yüksel, Serkan İpek, Firdevs Topal, Gonca Koç, Zehra Akpınar, James C. Slaughter, Orhan Oyar, Belkis Ünsal*

### ■ 271 The sensitivity of MR colonography using dark lumen technique for detection of colonic lesions

*Mehtap Beker Acay, Sibel Bayramoğlu, Akif Acay*

### ■ 279 Cold snare polypectomy versus hot snare polypectomy in endoscopic treatment of small polyps

*Fatih Aslan, Mehmet Camcı, Emrah Alper, Zehra Akpınar, Mahmut Arabul, Mustafa Çelik, Belkis Ünsal*

### ■ 284 The change in microorganisms reproducing in bile and blood culture and antibiotic susceptibility over the years

*Nuretdin Suna, Hakan Yıldız, Mahmut Yüksel, Erkan Parlak, Selçuk Dişibeyaz, Bülent Ödemiş, Onur Aydın, Zülfükar Bilge, Serkan Torun, Ayşe Yasemin Tezer Tekçe, İsmail Taşkiran, Nurgül Şaşmaz*

### ■ 291 Role of serum myeloperoxidase, CPK, CK-MB, and cTnI tests in early diagnosis of myocardial ischemia during ERCP

*Kemal Yıldız, Ali Tüzün İnce, Ahu Sarbay Kemik, Selin Sert, Hayati Can İsen, Mukaddes Tozlu, Birol Baysal, Ümit Akyüz, Orhan Kocaman, Ahmet Danalıoğlu*

### ■ 298 Transjugular intrahepatic portosystemic shunt: Where are we?

*Reskan Altun, Emre Yıldırım, Serkan Öcal, Enver Akbaş, Ali Harman, Murat Korkmaz, Haldun Selçuk*

### ■ 304 Public awareness of hepatitis B infection in Turkey as a model of universal effectiveness in health care policy

*Merve Gürakar, Mohammad Malik, Onur Keskin, Ramazan İdilman*

### ■ 309 Significance of appetite hormone ghrelin and obestatin levels in the assessment of the severity of acute pancreatitis

*Burhan Hakan Kanat, Refik Ayten, Süleyman Aydın, Mustafa Girgin, Ziya Çetinkaya, Yavuz Selim İlhan, Mesut Yur, Zekiye Çatak*

# THE TURKISH JOURNAL OF GASTROENTEROLOGY

## Case Reports

- **314 Primary mesenchymal tumors of the colon: A report of three cases**  
*Arzu Yaren, Serkan Değirmencioğlu, Neşe Çallı Demirkan, Atike Gökçen Demiray, Burcu Taşköylü, Gamze Gököz Doğu*
- **319 Mutatis mutandis: Are we diagnosing too many people with non-celiac gluten sensitivity? Multiple case report**  
*Raffaele Borghini, Giuseppe Donato, Marco Di Tola, Claudia Isonne, Antonio Picarelli*
- **323 Unusual presentations of eosinophilic gastroenteritis: Two case reports**  
*Regina Leal, Leonardo Fayad, Daniella Vieira, Teresa Figueiredo, Aldemar Lopes, Roberta Carvalho, Esther Dantas-Corrêa, Leonardo Schiavon, Janaína Narciso-Schiavon*
- **330 Hepatocellular carcinoma presenting as a huge intra-abdominal mass: A case report**  
*Erdem Okay, Alpaslan Sarı, Hülya Odabaşoğlu, Kazım Uygun, Tahsin Sarısoy, Yeşim Gürbüz*

## Letters to the Editor

- **333 Evaluation of patients with positive anti-mitochondrial antibody in laboratory conditions**  
*Serdar Olt, İhsan Uslan, Ahmet Tarık Eminler, İhsan Hakkı Çiftçi*
- **335 Cannabinoid-induced acute pancreatitis**  
*Yusuf Kayar, Hatice Eroğlu, Özgül Pamukçu, Hüseyin Çetin, Onur Koçaş, Mustafa Atçı*
- **337 Diagnosis of helicobacter pylori infection**  
*Kadir Öztürk, Yusuf Emrah Eyi, Yakup Aksoy, Mustafa Gezer*
- **339 Acute liver failure; what is different in Turkey and some remarks**  
*Ahmet Danalıoğlu*
- **340 Paraneoplastic presentation of cholestatic jaundice in renal cell carcinoma**  
*Sabiye Akbulut, Ayşe Baysal, Firdevs Topal*
- **342 Correct determination of abdominal fat accumulation**  
*Ümit Cintosun, Hasan Gürel, Gökhan Özgür, Cem Haymana, Bahadır Bilgin Başgöz, Umut Safer*

## Gastroenterology Elsewhere

- **344 Do we have to worry for thrombocytopenia during treatment of hepatitis C**  
*Ali Tüzün İnce*
- **346 Fecal microbiota transplant in immunocompromised patients: Encouraging results in a vulnerable population**  
*Tarkan Karakan*
- **347 How will I know whether “an apple is ripe or rotten”? A new proposed composite algorithm to predict acute liver failure in patients with drug-induced liver injury**  
*Veysel Tahan*
- **349 “Old classic cars” are hidden treasures: Colorectal cancer screening should be considered in unscreened persons over age 75**  
*Gülgün Tahan, Veysel Tahan*

# THE TURKISH JOURNAL OF GASTROENTEROLOGY

## From the Editor

■ We are sorry that the publication of this issue is delayed because of very poor quality of English of accepted articles assigned. The preparation for the August issue is in progress that it will be published until the end of this month. Afterwards, all issues will be online in the relevant month and subscribers will receive the print copy in the the same month. We have just started ScholarOne system that we will speed up the review process significantly. We expect that we are going to make the final decision for a submitted article in eight weeks at the latest and publish the accepted studies in the next sixteen weeks. Hence, the whole process from submission to the publication will not be more than 6 months and it would be as short as 4 months. Additionally, all the accepted studies without iThenticate or any other problem resulting with suspended publication (mostly for articles accepted before 2014) will appear in the "Articles in Press" section.

Please make note that in 2013, the average period from submission to the transmission of the first response to the author was 50 days. In the first half of 2014, we shortened it to 18 days. The average time spent for overall evaluation of an article by associate editors, namely, were: Veysel Tahan: 13 days, Seyfettin Köklü and Şahin Çoban: 19 days, Ahmet Danalıoğlu: 21 days, Ömer Başar: 26 days, and Billur Canbakan: 30 days. I am grateful to them for their perseverance.

***Please read the "Instruction to the Authors" section very carefully before submitting your paper. You will notice a very recent addition to this section***

A very important notice for prospective authors:

Please read the "Instruction to the Authors" section very carefully before submitting your paper. You will notice a very recent addition to this section:

**"Author please state:**

**What is the existing relevant knowledge in the area of your study?**

**What is new in your article ?**

**Three lines or less for each."**

Your paper should have been scrutinized, preferentially, by an agency in case at least one of the authors is not a native English speaker, because studies even with minor English problems will be rejected outright.

For case reports, submit original case series. Original isolated reports, should, preferentially be in letter-to-the-editor format. We prefer widely readable clinical studies.

We also start a process of reviewing the exact contribution of the authors to the study and we will not allow gift authorship any more that is prevalent in studies submitted from Turkey. We expect that there will be no more than six author names in an original article unless it is multi-center or that required an extensive labor. Author names should be less in case reports unless it entails a rare disease or condition with a cohort or multi-center. Author names should, preferentially, be three or less in letter-to-the editor. Please make note, **suspicion of gift-authorship in itself, will be a reason for rejection.**

We are envisioning that in 2015, we are going to achieve our best in terms of administrative process. When it comes to the question of the scientific level and readability of the published articles, it is, completely, up to you.
